

SATURDAY, MARCH 20<sup>TH</sup>

2 PM

OCCUPY YELLOW PINE

A Spring Eco-Event Series

*Please join us for:*

FOOD

DRINKS

and

OPEN MIC!

**Description:** NextEra Energy is preparing to bulldoze four square miles of wild Mojave Desert Land. They will destroy 93,000 old-growth Mojave Yucca, and the entirety of this healthy, carbon-sequestering ecosystem. We are advocating for Distributed Energy within the urban environment, so that America can transition to clean energy and also save the important ecosystems on public land. The Yellow Pine Solar project is the first of several massive solar projects to be approved in this valley, and they are currently removing desert tortoises from the site. We, the American public, are also losing access to these wild places.

Please join us for an afternoon of raucous reading and good vibes. Food and drinks provided; feel free to bring more, as well as a chair or blanket to sit on. Open Mic for anyone to read, speak, play or sing.

This will be a socially distanced gathering with masks and plenty of s p a c e.

For more information about the problems of utility-scale solar on public land, visit the Basin and Range Watch website:

<http://www.basinandrangewatch.org/>

**When and Where:** Saturday, March 20<sup>th</sup> @ 2pm until sundown at the Yellow Pine Solar Site, off of Tecopa Road near HWY 160. Look for our flags! Park on the side of Tecopa Road and walk into site. Click the link below to see a map:
